

Delivering Care
Safely & Efficiently

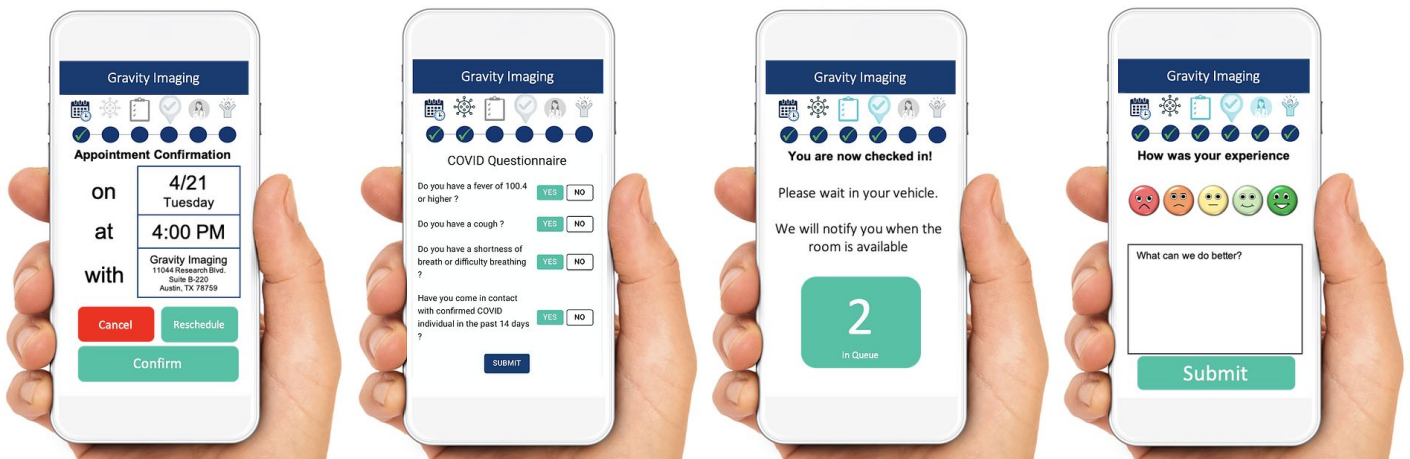

Executive Summary

You've lost 60-70% of your patient volume due to COVID19 pandemic and...

- Your practice needs to operationalize quickly to comply with the *Opening Up America Again* guidelines to include
 - COVID19 Screening Questionnaire
 - Documented Temperature Probes
 - Safe social distancing protocols
- Your patients and employees fear infection from the close proximity of the waiting rooms
- Your staff is reticent about adding more paperwork and tasks to their workload

Pre-COVID19, patients were cancelling, not showing for appointments and complaining of long wait times. The pandemic has escalated this problem. Therefore, for most outpatient healthcare providers, the new normal is a future without waiting room, driven by consumer demand. Are you adequately prepared?

Appointment Confirmation

The patient confirms one day before their appointment

COVID Screening

The patient completes paperwork and COVID screening before coming to the clinic

Virtual Waiting room

The patients automatically get checked-in upon arrival while they wait in their vehicle and are notified when the room is ready

Experience Survey

The patient completes satisfaction survey immediately after their exam

What is it

Gravity Zero automates your workflow enabling your patients to safely social distance in their vehicle instead of a waiting room, and automatically be notified on their mobile phone when the exam room is disinfected and ready for them.

Who is it for

Any healthcare provider that schedules patient appointments

How does it work

Gravity Zero is the newest module added to the Gravity automation suite. It can be deployed unbundled or can be purchased as a part of the family of products and services. Either way, it can be integrated into any EMR or RIS system and be operational in matter of hours.

Delivering care safely and efficiently

Automated Schedule Optimizer

Automated scheduler that predicts no-shows, cancellations and fills the slots with patients from your backlog increasing profitability.

Automated Virtual Waiting room

Automates your workflow enabling your patients to safely social distance in their vehicle instead of crowded waiting room.

Powerful Actionable Insights

Analytics in the right hands can be a powerful tool to drive the inefficiencies out of your operations.

Automated Patient Greeter

Automated greeter that guides a patient through the check-in process with a kiosk and provides useful information like wait-times.

About us

Based on the CEO's personal healthcare experience with his father, Alpha Nodus was formed to enable just-in-time care. The team includes technology industry leaders, mathematicians, six sigma black belts, data scientists, Ph.Ds. in machine learning, top engineering talent and healthcare executives who are also husbands, wives and caregivers. They have dedicated their life's work to achieving a lofty vision: for every provider to bring the wait time down to zero so a patient can see the doctor immediately when necessary.
